The Medicine that is always in season, and always does good, is

"L. F." ATWOOD'S BITTERS.

THIS POTENT REMEDY,

Mild, harmless, but SURE in its operation, purifies the Blood, restores the wasted energies, regulates all deranged functions, and gives new life and vigor to the whole system. It is unrivalled as a

LIVER INVIGORATOR,

and, highly concentrated, is warranted to contain more Medical properties in a 38-cent bottle than any other "INVIGORATOR" or "SARSAPARILLA" sold for a dollar.

Beware of a dangerous imitation purporting to be made and signed by one Nathan Wood. *Read what "L. F." Atwood says*, as follows:—

I have never sold my right nor interest in my ATWOOD BITTERS to one Nathan Wood, neither have I given information as to the mode of compounding the same to said Wood, and neither my brother or other relatives have ever had a recipe like mine; therefore I caution all who wish to purchase the *rightful* and *original* article, to see that the *Yellow Label* on each bottle bears my signature.

Remember my Initials, "L. F." L. F. ATWOOD.

☞ As a further safeguard, all bottles hereafter put up will have the above Trade-mark, "L. F." in Red Ink, on the *Yellow Labels*; also in Red Ink on the *White Outside Wrappers*.

CAUTION!—Persons dealing in these imitations are amenable to the law.

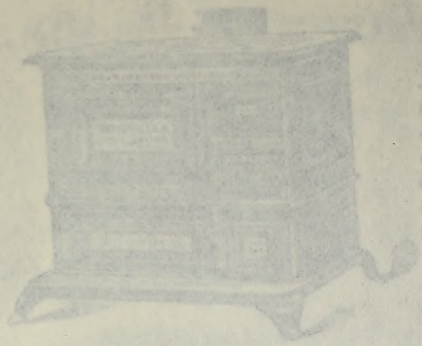
THE ARLINGTON PORTABLE RANGE.



CHILSON'S NEW RANGE, 1872.

The first night of this new and splendid Portable Range will convince all that its equal has never been seen, — in its Beautiful Design, Superior Plan Heavy Castings, with and without Flue Closets, and Discovery; also Hot Water Fronts for bath boilers, sitting Grates, Ash Pans, &c.

Housekeepers will be pleased with the PORTABLE RANGE.

CHILSON'S CELEBRATED AND UNRIVALLED BRICK AND PORTABLE FURNACES.

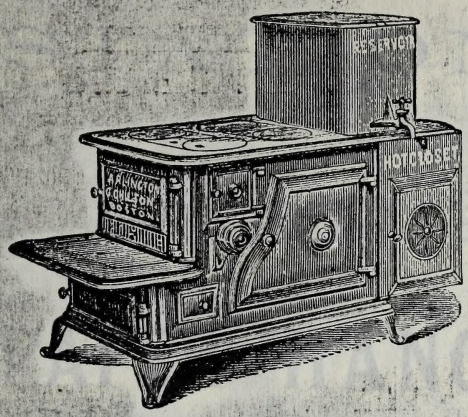
THE

ARLINGTON COOKING STOVE.

CHILSON'S NEW STOVE.—JUST COMPLETED.



Five minutes' examination of this Stove will prove it to be the CHEAPEST, NEATEST, MOST CONVENIENT and DURABLE, and in EVERY RESPECT the BEST COOKING STOVE ever made. WITHOUT EXCEPTION, the WATER FRONT FIXTURES for heating water, for BATH BOILERS, &c., are the MOST PERFECT EVER INVENTED. DO NOT FAIL to examine this Stove before purchasing elsewhere.

A VARIETY OF SIZES, WITH or WITHOUT Extension Tops, Reservoirs. Hot Closets, &c., &c.. for HARD or SOFT COAL, or WOOD, kept constantly on hand.

CHILSON'S PATENT

Elevated, Double-Oven COOKING RANGE

HAS BEEN REMODELLED AND GREATLY IMPROVED.

This Celebrated Range is universally acknowledged to be the most complete and perfect Kitchen Range in America.

No housekeeper, who would enjoy the comforts of a really perfect Kitchen Range, should fail to examine this before purchasing. Sizes adapted for dwellings, hotels, &c. with or without water-backs, hot closets, and hot-air fixtures for heating additional rooms.

It excels all others —

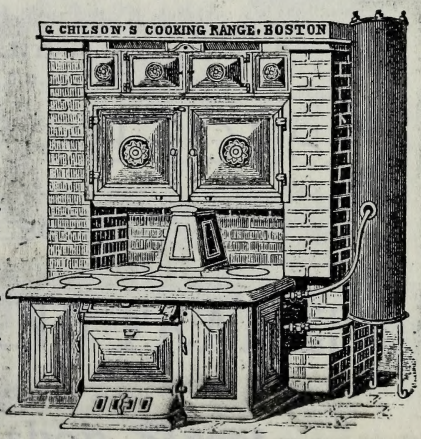
1st—In its entirely new principle for circulating the heat around either oven separately, or both ovens, as desired.

2d—In its heavy fine castings and thorough workmanship.

3d—In its GREAT ECONOMY OF FUEL.

4th—In its quick and even baking ovens.

5th—In its self regulating flues, without the usual complication of dampers; and finally, in its general beauty of design, durability, &c.



ALSO,

Parlor, Office, and Store Stoves, Patent Dampers, Registers, Ventilators, &c.

Warerooms: 99 and 101 Blackstone Street, Boston.

The Elevated Range is universally acknowledged to be the most complete and perfect Kitchen Range in America.

No housekeeper, who would enjoy the comforts of a really perfect Kitchen Range, should fail to examine this before purchasing, as it is adapted for washing, baking, &c., with or without water-reservoir, and closets, and hot-air flues for warming top cooking-room.

It excels all others—

1st—In its cellar-oven, which, for simulating the best brick oven, stands alone, especially in roasting meats.

2d—In the heavy iron cooking top, thoroughly constructed.

3d—In GREAT ECONOMY OF FUEL.

4th—In the quick and easy cooking, baking, roasting.

5th—In the well-ventilated, iron, with cast iron cooking-utensils, in the upper oven, which, with the closets, is the equal in size to any other stove.

Wigs, Half Wigs, Top Pieces, Front Pieces, Frizzes, Switches, Curls, Frizels,

PREFACE.

Five years have elapsed since a directory of these cities has been published, and the many changes and the large increase in population during that time make it apparent that this work is greatly needed.

We take great pleasure in presenting to our patrons and the public, the Lewiston and Auburn Directory for 1872–73, the first number published by us. It is as near correct as a work of this kind can be for the first time, and a great improvement upon all former editions. The two places have been thoroughly canvassed by experienced agents, and great care has been taken to present a reliable work for all who may have occasion to use it.

The chief difficulty we have experienced in properly designating the residences or places of business of citizens, has been owing to the incomplete and irregular manner in which the streets, almost without exception, are numbered. Our canvassers state that they often found the same number repeated two or three times on the same street; and in other cases, disparities of still more perplexing character. Of course the numbers were taken as they were found.

We take this opportunity to express our thanks to all who have aided us by their patronage and otherwise, and hope that we may deserve a *much larger amount* in the future editions of this work. Hoping this volume will meet the wants for which it is intended, we remain

Yours, truly,

Greenough, Jones & Co.

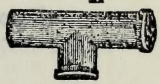
Stone Drain and Water Pipe.

FACTORY,

North End of Deering's Bridge.



J. N. Winslow, Treas., J. T. Winslow, Supt.

We desire to call the attention of the public, cities, and corporations to the following report. The figures given is the average pressure upon each square inch of the pipe:

OFFICE OF SUPERINTENDENT OF SEWERS, CITY HALL, Boston, Sept. 1, 1869.

TEST OF PORTLAND DRAIN PIPE.

12 inch, 78 lbs. per sq. inch. 8 inch, 103 lbs. per sq. inch. 4 inch, 225 lbs. per sq. inch.
10 inch, 120 lbs. per sq. inch. 6 inch, 130 lbs. per sq. inch.

Signed, W. H. BRADLEY.

It will be seen by the foregoing report that our Drain Pipe resists a pressure per square inch far greater than any other pipe manufactured, and it is also alike impervious to acids or other chemical agencies, and unaffected by the elements.

Glazed Stone Ware Pipes are used almost exclusively for sewerage purposes by all the large cities in this and foreign countries.

Our Pipes are of extra thickness. Equal to the best English imported. Warranted indestructible. Made from pure Fire Clay, and Glass coated.

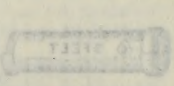
FACTORY,



North End of Deering's Bridge.

J. N. Winslow, Pres., J. T. Winslow, Sup.

We desire to call the attention of the public, and our customers in the Canadas, to the following report. The figures given is the average percentage of water absorbed by each of the pipes.

OFFICE OF SUPERINTENDENT OF SEWERS, Lowell, Mass., Dec. 1, 1866.

THE CONVEXAS PIPE PIPE

12 inch, 78 lbs. per 40 inch. 8 inch, 100 lbs. per 40 inch. 4 inch, 52 lbs. per 40 inch.
10 inch, 120 lbs. per 40 inch. 6 inch, 56 lbs. per 40 inch.

Signed W. H. HALLET.

It will be seen by the foregoing report, that our Stone Pipe resists a pressure per square inch far greater than any other pipe manufactured, and is a less after impregnating to acids or other chemical properties and consequently for the purpose.

Glazed Stone Ware Pipes are well adapted for use, especially for sewerage purposes by all the large cities in this and foreign countries.

Our Pipes are of extra thickness. Signed as the best English impregnation. Warranted indestructible. Made from pure Fire Clay, and clean ground.

CHURCHES.

FIRST BAPTIST CHURCH.

Bates, near Birch Sts.

Pastor, E. M. Haynes; Deacons, Stephen Davis, Wm. R. Wright, P. N. Dexter, A. P. Winslow; Clerk, C. W. Bennett.

This church was organized on the 24 of June, 1847, with twenty-five members. It now has a membership of nearly three hundred. The few at the beginning worshiped in an old school-house, with "gaping walls" and a "rotten floor;" their successors meet in a large commodious edifice of modern construction. The society has built

three meeting-houses, the first in 1848. It stood on Lincoln street, and cost about $1,000. The second was erected in 1853, on the corner of Main and Lisbon streets. This was a substantial brick structure, and is now occupied by the Second Methodist Society. The house of worship now occupied by this society was commenced in 1869, finished at a cost of $54.000, and dedicated May 18, 1870. This edifice is located on Bates street, head of Spruce, at the south-east corner of the Park, which it commands, on a spacious lot 150 feet front, and 200 feet deep. It is buit of brick, with granite trimmings, and pressed brick beltings, laid in black cement, and has a seating capacity of between seven and eight hundred. The wood-work inside is entirely of black walnut, highly polished, with ceilings frescoed and tinted in a manner which admirably relieves the dark effect of the wood. The style of the building is English Gothic, the entire interior and exterior bearing out this structural idea, from the foundation to the top of turrets and spire, and from the floor to the apex of the roof. This Gothic expression extends to church furniture, pulpit, and organ. All in all, this society has one of the most beautiful and commodious church edifices in the State.

In the twenty-five years of the society's history, it has had four pastors, Rev. George Knox, who was one of the council at its recognition, commenced his labors as pastor in August, 1847, and resigned January, 1860. Mr. Knox was immediately succeeded by Rev. N. M. Wood, D. D. Dr. Wood closed his labors March 31st, 1866. The third pastor, Rev. George W. Holman, commenced his labors in July following, and resigned Nov., 1868. The present pastor commenced his labors in April, 1869.

FREE BAPTIST CHURCH.

The house of worship now occupied by this society was commenced in 1869, finished at a cost of $54,000, and dedicated May 13, 1870. This edifice is located on Bates street, head of Spruce, at the south-east corner of the Park, which it commands, on a spacious lot 150 feet front, and 200 feet deep. It is built of brick, with granite trimmings, and pressed brick belting, laid in black cement, and has a seating capacity of between seven and eight hundred. The wood-work inside is entirety of black walnut, highly polished, with ceilings frescoed and tinted in a manner which admirably relieves the dark effect of the wood. The style of the building is English Gothic, the entire interior and exterior bearing out this structural idea, from the foundation to the top of turrets and spire, and from the floor to the apex of the roof. This Gothic expression extends to church furniture, pulpit, and organ. All in all, this society has one of the most beautiful and commodious church edifices in the State.

In the twenty-five years of the society's history, it has had four pastors, Rev. George Knox, who was one of the council at its recognition, commenced his labors as pastor in August, 1847, and resigned January, 1860. Mr. Knox was immediately succeeded by Rev. N. M. Wood, D. D. Dr. Wood closed his labors March 31st, 1866. The third pastor, Rev. George W. Holman, commenced his labors in July following, and resigned Nov. 1868. The present pastor commenced his labors in April, 1869.

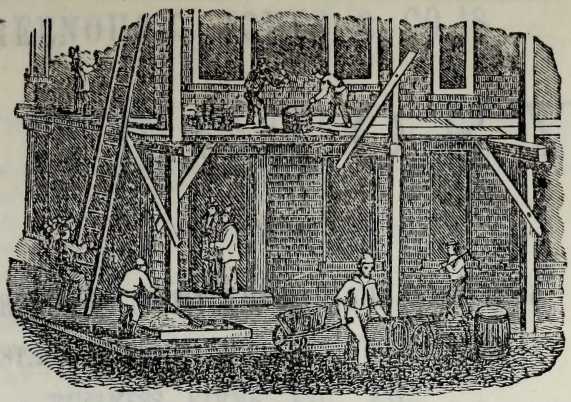
KINGMNA'S



PATENT.

New England METALLIC ROOFING COMPANY.

It is Superior to all other kinds of roofing now in general use.

What we claim for KINGMAN'S PATENT METALLIC ROOFING (not clinched or soldered, but lapped, cemented, and nailed to the roof) over all others is, that it is air and water tight, and adapted to roofs of any pitch, French roofs or walls, and cannot be blown off. It costs less than soldered tin roofs, is more durable and more easily repaired, though less liable to need repairs.

It has less vibration from heat and cold; the contraction and expansion of one sheet does not affect others, as in soldered Tin Roofs, to cause cracks, leaks, and rust. It costs less; is very much tighter than slate, and is so much lighter, that the building will keep its place much better with a lighter timbered roof and walls than with slate, or tar and gravel, may be flatter than slate roofs.

We can show roofs that have been on fifteen years for experiments, that remain tight and perfect.

We have been applying it with marked success since patented, and are prepared to fill all orders for roofing.

It costs less; is very much tighter than slate, and is so much lighter, that the building will bear its place much better with a lighter timbered roof and walls than with slate, or for and general, may be lighter than slate roofs.

We can show roofs that have been on fifteen years for experiments, that remain tight and perfect.

We have been supplying it with marked success since patented, and are prepared to fill all orders for roofing.
